ROOF SHEETING

CDEK

C-Dek roofing system features a concealed fix, meaning the fasteners are hidden from view, giving the roof a clean and streamlined appearance. This also helps to prevent water penetration and potential leaks.

Fielders C-Dek roofing system is known for its high performance in various weather conditions. The deep ribs and wide pans provide excellent water shedding capabilities, ensuring that water flows efficiently off the roof. This helps to maintain the structural integrity of the roof and protect the building from water damage.
Minimum pitch: 2 degrees.

TRIMDEK

One of the key benefits of Trim Dek sheeting is its versatility. It can be used for both roofing and wall cladding, providing a unified and aesthetically pleasing appearance to the building. The trapezoidal shape, combined with the ribbed design, ensures excellent water shedding capabilities, preventing water pooling and potential leaks.
Minimum pitch: 2 degrees.

CORRUGATED

Corrugated profiles offers several advantages. The ridges and valleys increase the structural integrity of the sheets, making them strong and capable of withstanding heavy loads and adverse weather conditions, including rain, snow, and wind.

The corrugated shape provides excellent water shedding capabilities, preventing water from pooling on the surface and minimizing the risk of leaks. This makes Corrugated Sheeting an excellent choice for roofing applications, as it helps to keep the interior of the building dry and protected.
Minimum pitch: 5 degrees.

SMOOTHLINE

Smoothline Sheeting features a clean and flat profile with minimal visible ribs or corrugations. It is designed to provide a modern and streamlined look to the roof. It can also be more resistant to debris buildup, such as leaves or branches, due to its smooth surface. Additionally, the clean profile of Smoothline Roof may contribute to easier maintenance and cleaning.
Minimum pitch: 3 degrees.

BUILT TO LAST

At Wanneroo Patios, it is our aim to give our valued customers the best value for money and the highest quality product. Our patios are the perfect choice for your outdoor space, giving you more time to relax, enjoy, and entertain all year round.

Having been building in Perth for over 40 years, you can rest assured that your new project is in trusted hands. We even include a 15 year structural warranty, for that added peace of mind, well above the Australian building code standard.

We understand that each home is different, which is why we work with you to custom build a design that is perfect for your home.
